REPORT

OF THE

COMMISSIONER GENERAL OF IMMIGRATION

DEPARTMENT OF LABOR,
BUREAU OF IMMIGRATION,
Washington, June 30, 1927.

Hon. James J. Davis, Secretary of Labor.

Sir: In surveying the myriad activities and accomplishments of the immigration field and bureau forces for another year, the thought which comes uppermost in my mind is the tremendous volume and infinite variety of problems disposed of. Here is a governmental agency dealing with human beings-aliens arriving, aliens departing, and aliens in our midst; aliens who want to come but do not know how to go about it, aliens who want to leave but are fearful of the possible consequences, aliens who, because of the fact that they were permitted to enter but temporarily, should leave, but do not want to do so. Merged with these are American citizens, near American citizens, alleged American citizens, persons of no nationality or dual nationality. The travel of American citizens in and out of our country and across our borders must be facilitated. Our officers must distinguish between them (naturalized or native-born) and aliens, with the least possible delay. The flow of humanity across our land borders alone aggregates in round numbers approximately 100,000 daily, or 36,500,000 entrants annually. In the matter of aliens, in particular, there are no two cases alike in all of their circumstances.

The law is designed broadly to classify, prescribe formulæ, fix limits, prohibit, and enjoin, and while it is all admirably conceived, representing as it does the fruit of many years' study upon the part of the lawmakers and experience of administrators, it does not and, in the very nature of things, can not take cognizance of the individual and all the possible circumstances, combinations of circumstances, and the limitless uncertainties inherent in human affairs—circumstances which may render two cases, identical perhaps as to law, utterly dissimilar in every other way and one of them needful of special consideration. In the view of every alien, and more frequently than not in the view of his relatives and friends, his case is exceptional; his case, it is reasoned, should therefore be decided differently from those of his fellows. The question is presented, Why can not we set aside the law in just this one case? "Surely one alien more or less in or out of the country can not be vital to the maintenance of the immigration structure." Always, never ending, is the plea for special treatment and indulgence; not from one alien but from thousands upon thousands. Countless

thousands of investigations have been made, countless thousands of letters have been painstakingly answered; sometimes as many as 20 or 30 in an individual case. We must be patient; we must explain again and again that, much as we sympathize with the motives, desires, and needs expressed, we can not yield where yielding involves a vital principle. Were we to do otherwise, the barriers and safeguards, which have been so painstakingly erected, would be speedily

The struggle for self-preservation is not, as many appear to believe, confined to aliens seeking to enter the country, nor to aliens who, having gained lodgment by unfair means, resist all efforts to dislodge them, but is shared by Americans and aliens alike who have a right to be and remain here in unimpaired enjoyment of the blessings which this country has to offer. Were we indefinitely and without limitation or discrimination to share these blessings with those who wish to come and whom we do not need and with the aliens already here who violate our hospitality, we would sooner or later be no better off than the supplicants; in short, we would eventually have no need of immigration laws, since the inducements to come here would cease to exist. The welfare of the millions making up our own country must steadfastly be held paramount. It is not nearly so cruel, if cruelty it be, to reject the ones who threaten our well-being. as it would be to subject those in our midst, who are healthy, happy, prosperous, and law-abiding, to the danger of unfair competition with its inevitable train of lowered living standards and other devitalizing processes. By every means within our power we strive, in seeking to effectuate the purposes of legislation, to avoid as well the causing of unnecessary suffering. By every means the bureau is seeking to emphasize and to impress upon our officers the need of the employment-along with firmness-of kindness, courtesy, and consistent helpfulness in their every contact and relationship with the alien who seeks by fair and honest means to come to or remain in this country. In this respect it is felt that substantial progress has been made.

In a survey of the more tangible and concrete accomplishments of the past year it is extremely difficult to say just which of the many stand out most prominently or which ones are of the greatest value. Perhaps ridding the country of over 26,000 aliens unlawfully here, despite an acute shortage of funds with which to carry on, might be regarded as the outstanding feature. It may be added parenthetically in this connection that heretofore in discussing this phase of the work of the Immigration Service, the figures given have had to do solely with those aliens removed from the country by means of formal deportation proceedings. An even larger number of undesirable aliens, aliens unlawfully here, have, upon investigation of their cases, expressed a preference to leave the country voluntarily rather than to leave it under writs of deportation. The figure given comprehends both classes. The continued development, by means of the immigration border patrol, of safeguards along our land and some of our coast boundaries, to render abortive the efforts of aliens attempting surreptitiously to effect entry and lodgment in this country, is most gratifying. Over 12,000 such aliens were apprehended by this agency alone during the past year. The further development of the system of examination abroad of intending immigrants by officers of the Consular Service of the State Department, assisted by technical advisers of the Immigration Service, is the accomplishment, however, that affords keenest satisfaction. These matters and many others of more than passing interest and importance are hereinafter discussed in more or less detail. The activities of the bureau and field forces of the Immigration Service are so numerous, diversified, and complex that to discuss them, as I would like to do, is impossible within the limits of a report of this character. Many of these are reflected in the tabulations which follow the text. For those who care to study them, they will be found eloquent of the magnitude of the work being carried on by the bureau and its field forces. tabulations do not, however, tell the story of the thousands upon thousands of human problems met and solved, nor do they afford the slightest conception of the patient toil, integrity, pride, loyalty, and self-sacrificing devotion to duty of hundreds of employees by or through whose efforts the results recorded have been made possible, nor do they reflect the steady, consistent improvement both in the field and in the bureau that has generally characterized the law's administration during the period covered by this report.

IMMIGRATION

VOLUME—CHIEF SOURCES—ADMISSIONS—REJECTIONS—DISTRIBUTION

During the fiscal year covered by this report 538,001 aliens were admitted and 253,508 departed, resulting in an increase of 284,493 in the alien population. In the fiscal year next preceding the net increase was 268,351, during which period 496,106 aliens were

admitted and 227,755 departed.

Of the 538,001 aliens admitted in the fiscal year just closed, 335,175 were immigrants, or newcomers for permanent residence, and 202,826 were nonimmigrants returning from a temporary sojourn abroad or coming here for a visit. Nearly three-fourths, or, to be exact, 180,142 of the aliens who departed in the fiscal year just closed were nonemigrants, i. e., those who had previously come for a short stay and those who, having come for permanent residence, upon departing announced an intention of returning. The remaining 73,366 aliens who departed during the year were emigrants leaving with the announced intention of residing permanently abroad.

Nearly one-half of the immigrants admitted during the past year came from countries in the Western Hemisphere, with Canada and Mexico far in the lead. These two countries, with 81,506 and 67,721, respectively, contributed nearly 45 per cent of the total number of immigrants for the year. Europe sent us 168,368 immigrant aliens in the same period, Germany with 48,513 leading the list, followed by the Irish Free State with 28,054, and Great Britain with 23,669. Italy sent us 17,297 immigrants this past year, and the Scandinavian countries 16,860. All the other countries of Europe combined sent 33,975. Compared with the figures for the previous year, Canadian immigration decreased 10.5 per cent, Mexican immigration increased 56.3 per cent, and European immigration increased 8.2 per cent. The principal contributions of the immigrant class considered racially were as follows: Mexican, 66,766; German, 56,587; Irish, 44,726; English, 40,165; Scotch, 25,544; French, 19,313; Scandinavian, 19,235; Italian, 18,529; and Hebrew, 11,483.

Less than one-sixth of the immigrants of the past year were children, 51,689 being under 16 years of age, while 254,574 ranged from

16 to 44 years, and 28,912 were 45 years of age or over.

The male immigrants numbered 194,163, the female 141,012. However, a number of countries furnished more females than males, conspicuously Greece, with 573 males and 1,516 females. Other countries the female immigrants from which exceeded the male were Belgium, Estonia, Finland, Hungary, Italy, Latvia, Lithuania, Poland, Rumania, Russia, Turkey, and Yugoslavia. The excess of females over males from these countries consisted mostly of the alien wives of United States citizens.

An interesting and, it may be said, wholly unexpected situation, and withal a thoroughly wholesome one, has developed from the present quota system as revealed by the figures showing distribution, by States, of quota immigrants. The newcomers are spreading more evenly throughout the country than before. No longer is there the same concentration of the flow to the congested centers of population of the East; on the contrary, there is a marked drift to the Central West and to the States beyond the Rockies. However, the State of New York still leads all others as the settling ground of the present-day immigration, although its overwhelming lead of prequota years has been lost. This situation is partially reflected in the following figures: During the last fiscal year there were 87,864 immigrant aliens admitted who gave the Empire State as their destination, while 32,363 from that State were recorded as emigrating, a net gain of but 55,501, a figure in sharp contrast with those representing New York's gains in the years before the World War. Massachusetts received 25,907 and lost 5,900, a net gain of 20,007. Michigan received 28,104 and lost 3,128, a net gain of 24,976. Texas, a distinctly agricultural State, received 43,139 and lost but 1,467, a net gain of 41,672. Of the Pacific Coast States, California received 26,029 and lost 4,954, a net gain of 21,075. Washington received 5,440 and lost 1,085, a net gain of 4,355. The Southern States, as usual, gained but little by immigration, Florida receiving the largest number, 2,512 going to that State and 1,360 leaving, a net gain of 1,152. South Carolina received the fewest of all, 56, and lost 9, a net gain of 47.

If the amount of money per capita exhibited by immigrants upon arrival may be regarded as any index to their relative economic value, racially considered, the Pacific Islander came first, followed in the order named by the Welsh, Spanish American, East Indian, English, Spanish, French, Scotch, and Dutch. Immigrants of these races admitted during the fiscal year ended June 30, 1927, were recorded

as bringing an average of \$97 each.

A total of 15,809 aliens "ineligible to citizenship" were admitted during the fiscal year 1927, mainly as returning residents, visitors, or transits. Of this number there were 8,305 Chinese, 218 East Indians,

7,177 Japanese, 90 Koreans, and 19 Pacific Islanders.

The total recorded number of aliens of all classes admitted at Canadian borderland ports during the fiscal year, including those coming initially for permanent residence and those returning for permanent residence after more than six months' absence, was 95,420. Seventy-seven per cent, or 73,222, of these were born in Canada and the bulk of them came in under the act of 1924 as natives

of that country. Of the remainder, 19,938 were born in Europe, being mostly quota immigrants; 1,186 were born in Newfoundland, 376 in Asia, 346 in Australia and New Zealand, and 352 in other countries. Aliens of the same statistical status admitted during the same period at Mexican borderland ports numbered 81,539; practically all of these (over 96 per cent) were natives of Mexico.

There is a continuous exodus of aliens to Europe, particularly to the southern and eastern sections. During the past year 33 emigrant aliens returned to Europe for every 100 immigrants admitted from that continent, but considered as a separate group the emigration to Finland Greece, Hungary, Italy, Portugal, Spain, and Yugoslavia

was greater by 5,879 than the immigration therefrom.

During the year 19,755 aliens were barred from entering the United States, this being the lowest number for any year since the present quota law went into effect. Of this number only 3,111 were rejected at the seaports of entry while 16,644 were turned back at ports of entry along the land border. At New York, our principal seaport, and where the bulk of the immigration from overseas continues to land, 299,112 aliens sought admission during the year, of whom 1,319 were barred, or less than 5 out of every 1,000 applicants. The majority of these rejected were stowaways and seamen seeking lodgment in the United States without first having obtained visas from American consuls. At the same port during the flood tide of immigration before the World War, when no quota restrictions were in effect, nor any prefiltering by United States officers in Europe, the ratio of rejections was over 16 for every 1,000 applicants.

Alien stowaways discovered on board of vessels arriving at United States ports during the fiscal year just closed numbered 1,906, and alien scamen to the number of 23,447 deserted their ships. This is an increase of both classes as compared with the previous fiscal year, when 1,789 stowaways and 18,456 deserting seamen were reported. The restrictive force of the present immigration laws may best be realized by comparing the total number of immigrants received during the past fiscal year with one of six years prior to the World War when immigration passed the million mark. A considerably larger number of aliens then came from certain individual countries than now come from all Europe. In the year 1913, when immigration reached the total of 1,197,892, the former Russian Empire contributed 291,040 immigrants to this country, and during the same year 265,542 came from Italy, while 254,825 came from Austria-Hungary. In the fiscal year 1927 only 168,368 immigrant aliens were admitted from all European countries.

MEXICAN IMMIGRATION

The total Mexican immigration to the United States during the fiscal year ended June 30, 1927, was 80,639, comprising 66,766 immigrant aliens, or newcomers for permanent residence in this country, and 13,873 nonimmigrants, aliens of the temporary class, either coming for a visit of less than a year or returning after a short absence from the United States. During the same period, 10,954 Mexican aliens were recorded as leaving the United States, practically all going to Mexico, 2,774 being of the emigrant class and 8,180 of the nonemigrant class. The net addition of this race to the alien popu-

lation of the United States for the year just ended was 69,685. This is 15,237 more than for the fiscal year 1926 and 24,667 more than for the year 1925, but 32,530, or 31.8 per cent, less than the excess for the fiscal year 1924, the peak year for admission of Mexicans, a total of 105,787 aliens of this race having been admitted that year and

only 3,572 departed.

While the real immigration of Mexicans—immigrant aliens—during the fiscal year 1927 exceeded that of the preceding year by 24,128 and that of the year 1925 by 34,388, it was 20,882, or 23.8 per cent, below the high-water mark for arriving Mexicans reached in the year 1924. The number of Mexican immigrant aliens admitted during these four years was 66,766 in 1927, 42,638 in 1926, 32,378 in 1925, and 87,648 in 1924. The abrupt drop in the number of immigrants in 1925 was undoubtedly due, very largely, if not entirely, to the fact that it was the first year following the adoption of the visa requirement and visa fee of \$10.

The immigration statistics also show that the bulk of the Mexican immigrants admitted are adults, 41,475, or 62.1 per cent of the total admitted, being over 21 years of age and three-fourths (31,159) of these were males. The ratio of all minors and adult females to adult males is approximately 5 to 4. As to the sex, age, and conjugal condition of these Mexican immigrants, 48,107 are males and 18,659 females; 10,304 are under 16 years of age, 14,987 are from 16 to 21 years old, 22,010 from 22 to 29 years, 9,723 from 30 to 37 years, 4,906 from 38 to 44 years, and 4,836 are 45 years of age or over. The male single numbered 27,558 and the female single 9,113; the male married, 19,783, and the female married, 7,622; the male widowed, 751, and female 1,903. There were 15 male and 21 female divorced.

Only one Mexican out of every three was going to join his immediate family or other relative already established in the United States, and in addition the male married were nearly three times the number of female married. These facts indicate, as did the figures for the previous year (1926), that many of the Mexican wage earners are

coming alone, leaving their families in Mexico.

Of the 66,766 Mexican immigrants admitted in the fiscal year 1927, the unskilled workers predominate, 33,832 giving their occupation as that of common laborer, 1,615 as farm laborer, and 1,376 as servant. The professional class numbered only 988, the teachers leading the list with 320, followed by the clergy with 189 and musicians with 159. There were 4,722 recorded as skilled workers of various kinds and 1,491 as of the miscellaneous classes, while 22,742 were listed as

having no occupation—mainly women and children.

With few exceptions, all the aliens coming from south of the Rio Grande are of the Mexican race and all the Mexicans admitted are natives of Mexico. During the fiscal year 1927 a total of 81,722 aliens, born in Mexico, were admitted to the United States, and of this number 77,155 entered the country under section 4 (c) of the immigration act of 1924. Of the 80,639 Mexican aliens admitted during the past year, 80,499 were natives of Mexico and 76,657 entered the United States under section 4 (c) of the act. If the quota limitations applied to Mexico her annual allotment, based on 2 per cent of the 77,853 natives of Mexico in this country in 1890, would be 1,557.

Aliens of the Mexican race debarred from entering the United States during the fiscal year 1927 numbered 1,794 (1,165 male and 629 female). The principal causes for these rejections were: Without immigration visa (1,356), likely to become a public charge (206), mentally or physically defective (75), unable to read—over 16 years of age—(64), and criminal and immoral classes (44). In the same year, 2,701 Mexicans were deported under warrant proceedings after entering the United States, practically all having been returned to Mexico via the land border.

In the fiscal year 1927 a total of 2,774 emigrant aliens of the Mexican race left the United States to make their future homes in some foreign country, mainly Mexico; or about 4 Mexican emigrants having been recorded as permanently departed for every 100 Mexican immigrants admitted during the year. The bulk of these departures were recent arrivals in the United States, 2,006 of the Mexican emigrants leaving during the year 1927 having made their permanent residence in this country from 1 to 5 years and 2,431 not over 10 years, while 191 had been here from 10 to 15 years, 96 from 15 to 20 years, 28 from 20 to 25 years, and 28 had resided here continuously for over 25 years. Of the Mexican emigrants leaving last year, 1,978 were males and 796 females; 1,652 were recorded as single, 974 as married, 146 as widowed, and 2 as divorced. The number giving their ages as under 16 years numbered 307; 2,255 were in the prime of life, from 16 to 44 years of age, and 212 were 45 years of age or over.

In last year's annual report reference was made to the fact that 486,418 persons born in Mexico were resident of the United States as shown by the census of 1920; that since then the net increase of Mexicans though immigration was 369,480, making a grand total of 855,898 Mexicans then in the United States, to say nothing of the number of such aliens who presumably have entered since 1920 through other than the regular channels. The estimate then made of a resident population of over 1,000,000 Mexican aliens is believed to understate the situation rather than overstate it.

The following table showing persons in the United States and specified cities reported as born in Mexico—as shown by the census reports from 1850 to 1920—is interesting in this connection:

1920	1910	1900	1890	1880	1870	1860	1850
86, 418	221, 915	103, 393	77, 853	68, 399	42, 435	27, 466	12, 317

THE QUOTA LAW

As indicated by what has preceded, the present quota law, coupled with preinspection abroad, accomplishes, with a minimum of hardship and complaint, even more than its most ardent proponents expected of it.

The State Department exercises exclusive jurisdiction abroad in determining who shall be granted visas to come to this country and the work of its representatives is characterized by the utmost fairness to all applicants. The aliens here no less than those resident in the Old World, have come to have an understanding of its essentials. It is humane, it is just, it is definite, and all with a proper regard for the assimilative capacity of our own country. It is not, however, selective in the sense that it permits us to take or even invite those whom we particularly prefer or need when we prefer or need them, but it does permit of a sane, deliberate preliminary filtering abroad of candidate immigrants, a separation of the specifically proscribed from those not specifically inhibited by law-all unaccompanied by the hysteria of complaint and criticism that characterized the old system of unlimited immigration. In other words, while we can not say who shall apply nor whom we prefer or need, yet to those who do present themselves to our consuls abroad we are afforded an opportunity to say, as to any individual, "You are specifically disqualified by certain provisions of our laws and we can not give you a visa." The point which it is desired particularly to emphasize would perhaps best be made clear by an illustration. Let us suppose that the quota of a particular country were approaching exhaustion and there were a long waiting list of candidates of that nationality. Taking the candidates in their order, as obviously the officers must if there is to be perfect fairness, a prospective shoestring peddler destined to New York is up for examination; he has sufficient funds; he meets the physical requirements; nothing against his character is developed. In the line somewhere behind him is a quarryman destined to Barre, Vt.; he also has sufficient funds; he meets the physical requirements; there is nothing against him; but the quota is exhausted before he can be reached. We do not need the shoestring peddler; we need the quarryman; but the shoestring peddler "wins." This "first come first served" process which permits economic undesirables to get within reach on the current limited waiting lists and to crowd out many economic desirables is faulty, but even with its faults it is infinitely better than the old haphazard one, when the volume of the flood was regulated by the capacity of shipbuilders to build ships in which to carry immigrants, the lines to buy them, and Ellis Island to accommodate the human cargoes.

NATIONAL ORIGIN

Section 11 (a) of the immigration act of 1924, known as the quota act, provides that the annual quota of any nationality shall be 2 per centum of the number of foreign-born individuals of such nationality resident in continental United States as determined by the United States census of 1890, but the minimum quota of any nationality shall be 100. This basis of computation is an excellent one. The volume and general quality of immigration resulting therefrom is more satisfactory than the quantity and quality of any immigration received in the three decades prior to 1921. This basis certainly should not be tampered with.

In the same section of the same act, paragraph b, there is a provision that the annual quota of any nationality for the fiscal year beginning July 1, 1927, and for each fiscal year thereafter, shall be a number

which bears the same ratio to 150,000 as the number of inhabitants in continental United States in 1920 having that national origin (ascertained as hereinafter provided in this section) bears to the number of inhabitants in continental United States in 1920; but the minimum quota of any nationality shall be 100. This is known as the national-origin plan. It did not go into effect on July 1, 1927. The Congress by special and independent action during the last session postponed the operative date of this plan for one year.

FOREIGN SERVICE

The annual report of last year contained comment on the gratifying situation resulting from the examination abroad by American consuls, assisted by technical advisers of the Immigration Service, of intending immigrants. The year just closed is the third since the examination abroad was inaugurated and the second during which technical advisers of this service have been attached to the American consulates.

During the past fiscal year, at the request of the Governments directly concerned, technical advisers have been assigned to our con-

sulates in Italy and Czechoslovakia.

A technical adviser is now assigned to each of the following European cities: Antwerp, Belgium; Belfast, Ireland; Bergen, Norway; Berlin, Germany; Bremen, Germany; Cobh, Ireland; Copenhagen, Denmark; Cologne, Germany; Dublin, Ireland; Genoa, Italy; Glasgow, Scotland; Gothenberg, Sweden; Hamburg, Germany; Liverpool, England; London, England (2); Naples, Italy; Oslo, Norway; Palermo, Italy; Prague, Czechoslovakia; Rotterdam, Holland; Southampton, England; Stockholm, Sweden; Stuttgart, Germany; and Warsaw, Poland; a total of 25 in all with one additional man for relief detail.

Taking the arrivals at the port of New York as a basis, the records of the bureau show that in the three years prior to the inauguration of the foreign inspection service, that is to say the fiscal years 1922, 1923, and 1924, out of every 1,000 arrivals there were debarred 14, 11, and 15, respectively. In the fiscal year 1925, the first in which examination abroad occurred, 12 aliens per 1,000 were debarred upon reaching the United States, and during the fiscal years 1926 and 1927, following the assignment abroad of technical advisers of the Immigration Service, the ratio of those debarred to each 1,000 aliens arriving dropped to 6 and 4, respectively. The ratios given are based upon all aliens applying at New York for admission regardless of country of origin and regardless of whether they came from countries to which technical advisers had been assigned. The bureau's records show that, as to aliens arriving at New York from countries to which technical advisers have been assigned, the ratio of debarred is less than 1 to each 1,000 arrivals.

The figures quoted speak more eloquently than anything else could

of the success of the system.

It is reasonable to hope and believe that as the system develops hardships attendant upon exclusion of immigrants at our ports will become prestically an interest of the control of the c

become practically nonexistent.

The system where it has been placed in operation has practically eliminated cases of hardship at ports of the United States and has proved also a distinct financial benefit not only to those who have migrated to this country but to those others as well who might other-

wise have undertaken a fruitless journey. The wonderful success of this system is due in a very substantial measure to the splendid cooperation of the American consular officers, officers of the Public Health Service, and technical advisers of the Immigration Service.

DEPORTATIONS (EXPULSIONS)

Ridding the country of undesirable aliens found to be unlawfully therein continues to be one of the most important functions of the Immigration Service. During the fiscal year covered by this report 12,055 aliens were disposed of through, or by means of, the institution of deportation proceedings. Of this number 7,249 were deported at the expense exclusively of the immigration appropriation; 1,504 aliens were deported in which cases the steamship lines responsible for their introduction into this country were held liable for the cost of the ocean voyage; 1,638 were permitted to ship one way foreign as members of crews of departing vessels, and 1,664 were permitted voluntarily to depart at their own expense.

Of the 12,055 aliens mentioned, approximately 4,700 were returned to Europe, 3,000 to Canada, 3,055 to Mexico, and 600 to other countries in the Western Hemisphere. Approximately 600 deportees were sent to Asia, and 100 to Africa, Australia, and the Pacific

islands.

The total number of undesirables whose removal from the country was brought about in the manner above indicated exceeds that for the previous fiscal year by approximately 1,151, and establishes a new high record for the service, notwithstanding the fact that the absence of sufficient funds with which to "carry on," resulting from the failure of the second deficiency bill to pass in the last session of Congress, necessitated a sharp curtailment during the last quarter of the fiscal year of all activities designed to rid the country of undesirable aliens unlawfully here.

At this juncture it may be timely to mention the fact that when Congress adjourned on March 4 last, there were awaiting deportation over 7,000 undesirable aliens of various classes and nationalities in respect of whom warrants of deportation had issued, but owing to the threatened deficit only 3,410 of them were subsequently deported, and, with the aliens arrested subsequent to March 4, the close of the year found fully 7,000 throughout the country awaiting deportation. Of this number about 2,500 were at large on bond or upon their own recognizance, about 2,200 were in detention at the expense of the Government, and about 2,300 were in detention in institutions at the expense of various States and municipalities.

Ninety-two deportation parties were moved during the year.

These group movements saved many thousands of dollars.

With respect to the aliens permitted to reship one way foreign as a compliance with orders of deportation, statistics showing those who were experienced seamen (or who had made at least one previous voyage as a member of the crew of some vessel) and those who had no such previous experience have been maintained only since January, 1927. It is interesting to note, however, even from these meager data that of the 587 deportees who were permitted to leave the United States in the manner indicated between January 1 and

June 30, 554 had had some previous experience as seamen, while

33 were without experience.

In addition to the foregoing there were approximately 14,619 aliens subject to deportation (in respect of whom formal removal proceedings were not initiated) who were permitted voluntarily to depart.

Summary

	Number of aliens	Savings to appropriation
Warrant proceedings instituted: Deported at expense of immigration appropriation Deported (ocean voyage at expense of steamship companies). Permitted to ship foreign one way as a compliance with warrant of deportation. Departed—paying own passage—as a compliance with warrant of deportation. Departed across land bolders! Total. Subject to deportation; voluntarily departed; warrant proceedings not instituted: Shipped foreign one way. Paid own passage. Departed for foreigh contiguous territory Total.	939	At \$100 per capita 16, 500 At \$100 per capita 93, 900 At \$20 per capita 270, 300

¹ Warrants of deportation not issued.

ALIEN INMATES OF PENAL INSTITUTIONS, INSANE ASYLUMS, HOSPITALS, AND POORHOUSES

During the month of January, 1927, a survey was made of institutions of the character indicated in the caption hereof situated within continental United States, Alaska, Honolulu, and Porto Rico, to determine the number of alien inmates in such institutions. Prisons, penitentiaries and jails were found to contain 45,193; insane asylums and other institutions for the care of such cases were found to contain 37,470; hospitals and sanitaria were found to contain 14,383; and poorhouses 16,059; a total of 113,105.

The economic loss represented by these figures is appalling. Each alien considered economically is less than zero; he is a distinct liability. The amount of money expended annually to support these

aliens would equip and maintain a fair-sized standing army.

REENTRY PERMITS (INCLUDING CHINESE)

During the fiscal year just closed 112,254 applications for reentry permits were received and considered, of which 102,195 were granted and 5,840 were denied, leaving 4,219 pending at the end of the year. Applications for the extension of the life of permits issued were granted in 9,110 cases. A fee of \$3 is charged for each permit or extension thereof granted. The total income from these sources was \$333,915, which sum was covered into the Treasury, representing an excess of \$7,815 collected as compared with the previous fiscal year, due

entirely to an increase in the number of extensions applied for and

granted.

With the close of the fiscal year covered by this report the reentry permit system has been in operation three years. During this period there have come to light \$8 cases in which aliens have fraudufently obtained admission to the United States on permits issued to other persons, by substitution of photographs on the permits. time since steps were taken to render this sort of fraud practically impossible in the future. During the same period 66 cases came to light in which reentry permits, counterfeit in their entirety, were used by aliens in an effort to gain admission. Twenty-two succeeded. Since the new regulation went into effect on July 9, 1926, requiring that aliens be identified by immigration officers prior to departure and before receiving permits, there has been but one case discovered in which an alien has attempted a substitution of the photograph on a bona fide permit. He was apprehended at the port of entry and The counterfeiting of reentry permits in their entirety has also been rendered extremely difficult by the adoption of a new style of form, since the introduction of which no counterfeit has come to light.

The use of reentry permits upon the part of aliens lawfully admitted for permanent residence (desiring to proceed abroad temporarily) in order to obviate the necessity of providing themselves with non-quoto visas, will doubtless grow as the advantages arising from their use become more widely known. Contrary to a popular misapprehension (formerly quite widespread but fortunately steadily diminishing) these reentry permits do not insure the readmission of their holders. Any alien returning with a reentry permit after a temporary absence abroad is subject to full inspection under the immigration laws, and, if found for any cause thereunder to be inadmissible, he must be excluded. In short, the reentry permit is merely an instrument by means of which the holder is enabled upon return to the United States to identify himself as one who has been previously lawfully admitted for permanent residence, and one who, if otherwise admissible, will be permitted to reenter without other

documents.

VISA PETITIONS

During the past fiscal year 34,169 petitions were filed by American citizens for the issuance of nonquota visas in behalf of wives and unmarried children under 18 years, and for preferential status in the issuance of quota visas for children between the ages of 18 and 21 years, parents, and husbands, an increase of approximately 10,300 over the preceding year. Of this number 27,623 were approved and 3,203 rejected, the remainder, for one reason or another, not being perfected.

Petitions for nonquota visas in respect of 25,500 individuals were approved, and for preferential status in respect of 13,543 individuals, a total of 39,043 persons. Of this total 16,256 were Italians, 7,079 were Poles, 1,811 were Greeks, and 1,710 were natives of Czechoslo-

vakia.

Early in October a most pronounced increase was noted in the number of petitions filed. This fact is not lacking in significance when consideration is given to the fact that 2 years and 90 days had

then elapsed since the effective date of the immigration act of 1924, or approximately the period of time which would have to intervene between the filing of a declaration of intention to become a citizen and the receipt, in the ordinary course of business, of a final naturalization certificate. Approximately 75 per cent of the petitions received during the year were filed by persons whose naturalization had occurred at a comparatively recent date. These facts, together with those set forth in the paragraph immediately preceding considered collectively, might not unreasonably lead to the conclusion that natives of certain countries are not altogether uninfluenced in procuring naturalization by consideration of the advantages such a course of action affords them in securing the admission to the United States of close relatives.

IMMIGRANT STUDENTS

During the fiscal year 1925, 1,462 aliens were admitted to the United States as nonquota immigrant students in accordance with the provisions of section 4 (e) of the immigration act of 1924. During the fiscal year 1926, 1,920 were so admitted, and during the past fiscal year, 1,833 were admitted, making a total of 5,215 for the entire period since the student provision went into effect. Of this total, 1,085 have completed their studies and left the United States, and 135 warrants of arrest, with deportation in view, have been issued in respect to admitted students who have failed to comply with the law's requirements.

During the year just closed 128 schools have received full approval as institutions of learning for immigrant students, making the total number to date so approved 1,034. In many cases, upon the recommendation of American consuls abroad, approval has been given to

a school in respect of an individual student only.

Considerable difficulty has been experienced in respect to students who have entered the country without being qualified to enter classes conducted in the English language. During March of the past fiscal year each accredited school was advised that in the future a certificate of admission must state positively whether the school could accept non-English-speaking students. The State Department then advised consular officers abroad that if an applicant for a nonquota student visa could not speak and understand English easily and the school had not stated it could accept a non-English-speaking student, further investigation should be made before a visa issued. Although the time has been too short for any marked results from this action, it is believed that the difficulty referred to will be largely corrected.

ALIEN SEAMEN

Throughout the history of immigration legislation bona fide alien seamen have occupied a favored position. Privileges have been extended to them accorded to no other class. They come and go practically at will; they are free to desert their vessels without prejudice so far as the immigration laws are concerned. About the only restrictions imposed upon them are that they shall not be carriers of disease, or, if ill, that they shall be removed to a hospital until cured or taken back if not readily curable. The sailor is indeed a privileged

character among aliens. Considerations of international trade, comity, and amity have thrown a protecting mantle about him and set him apart as a man whose liberty of action is not to be lightly abridged. The theory is sound, unassailable; it has persisted throughout the ages and among all civilized and some semicivilized countries. In short, the alien seamen has been an ambassador of trade and good will, enjoying prerogatives in keeping with his calling far beyond those possessed by the landsmen. This is as it should be. But unfortunately, with the gradual development in this country of stricter immigration policies, a horde of pretenders has arisen to usurp the seaman's time-honored position. The bona fide seaman or crewman of to-day is not, generally speaking, a sailorman; he is literally what his name implies, a man of the sea-no more no less. With the advent of steam his job underwent a tremendous change. No longer is it necessary that all seamen shall serve an apprenticeship—become skilled in seamanship. Many so-called seamen are coal passers, cooks, waiters, laborers. The latter need but be fairly strong and willing to work. Commerce of the seas has become prosaic and little, if any, more hazardous than the factory.

Many aliens, unable to enter our country as immigrants, are "signing on" as seamen with ships bound for this country. They need not necessarily have had previous experience as seamen, and certainly none as sailormen. They accept eagerly whatever is offered in the way of wages. What difference do wages make? They will desert upon reaching America anyway, without even claiming their pay; or, if signed on one way, they will simply claim their pay and announce to the immigrant inspector an intention to ship out on another vessel, and, unless the officer divines their true intentions, they will go ashore with the rest of the crew. Once ashore the immigration law permits any seaman to look about for another ship out. What is easier or simpler if one wants to stay in Thus reasons the pretender, and quite correctly. There is no doubt that the number of aliens who thus gain lodgment is steadily increasing. We can not deny the bona fide alien seaman the right to come ashore and look for another berth foreign bound. We can not penalize him for deserting his ship. What are we to do with the pretender—the alien seaman so-called, who "signs on" abroad with no other thought than to remain here once he gets in? We have wrestled with the problem for years. No legislative measure yet devised has proved an effective remedy, and the situation yearly becomes more acute. Our quota laws limit the number of bona fide immigrants who may come, but not the number of immigrants in the guise of seamen. We are gradually developing safeguards against the surreptitious entry of aliens along our land borders, but our seaports are wide open to fictitious seamen. This is no less true of the Asiatic than of the other races. With the adoption of a system of percentage restrictions upon immigration the incentive to evade, dissemble, and deceive has nowhere been more apparent.

There may be other and better remedies for this steadily growing menace than to compel vessels bringing alien seamen to our shores to take out an equal number when leaving, but, if so, we have so far sought for it in vain. Such a law would place responsibility directly where it belongs—on the ship. I believe it would quickly discourage

the practice now so prevalent of overmanning ships in foreign ports with nondescripts whose one and only interest in securing a berth is the opportunity it affords to secure a foothold in the United States.

BOOTLEGGING OF ALIENS

Since the placing on the statute books of restrictive legislation and as a consequence of more recent numerical limitation of immigration, the bootlegging of aliens—a lucratively attractive field of endeavor for the lawlessly inclined—has grown to be an industry second in importance only to the bootlegging of liquor. In fact the two not infrequently go hand in hand. The bootlegger of liquor is versatile; expediency and profit are his chief, if not only, concern. Is money lacking for investment in liquor?—then a load of aliens. Handling the latter necessitates no cash outlay; in fact, it means ready money, cash in hand, before the start is made, with more to follow upon delivery at destination. The retainer is frequently in proportion to the ability of the alien to pay and the hazards involved, but mainly his ability to pay. True, this elastic schedule does not so fully obtain among the better organized and more reputable bootleggers. rates of the latter are fixed. "Take it or leave it" is their rule—no cutting of price; but, on the other hand, the more reputable bootlegger will not abandon his cargo at an isolated spot a few miles inland upon the pretext of going to some filling station to replenish his supply of gasoline or to Nor will be, abandoning all pretense, hold up his charges at the point of a gun and strip them of their last penny. Such methods are left to the freebooters of the industry, men who do not value their reputations. The bootlegger of aliens is more frequently than not an alien himself. If he deals fairly, he builds up a good thriving business, and his prestige grows, particularly among his own countrymen. But the candidate for unofficial entry who is without sufficient funds to employ this high-grade talent must resort to the price cutter and trust that he will not be betrayed. The credulous ones take an awful risk, but the lot of the fellow who embarks upon the venture alone and wholly unaided is indeed a hard one, if not hopeless, unless, of course, he has selected as his objective a populous center in the promised land close to the border, where he can quickly lose his identity among the resident population.

Cuba and the Bahama Islands continue to be relay stations or bases from which entry to Florida is sought by the proscribed alien, but with the continued strengthening of the immigration border patrol in that section, the latter does not enjoy the same popularity

among the smuggling fraternity as formerly.

Our land frontiers, especially in the neighborhood of cities and towns of any size, and particularly industrial centers, continue to offer an enticing prospect to the alien bent upon breaking into our country. As shown elsewhere in this report under the heading "Border patrol," over 12,000 such aliens were apprehended by officers of that arm of the Immigration Service; in addition to which over 1,400 were turned back and directed to proper channels.

The methods employed by professional smugglers are continually changing. It is a war of wits between the smugglers and the patrol. The effectiveness of the latter is proportionate to its mobility, scouting radius, absence of fixed formula, and the number of men engaged.

Finding his way into this country unchallenged in the air, the bootlegger of aliens is more and more frequently going aloft. This is a condition that threatens to grow rapidly and soon to get out of hand unless ways and means to combat it are supplied in the no distant future. An ounce of prevention will be worth a pound of cure in the way of subsequent deportation. A few planes and trained fliers now will go a long way toward putting a quietus on this new and threatening development in the smuggling game, but allowed to grow unchecked, indefinitely, it will, it is feared, prove all but impossible of eradication without the outlay of tremendous sums of money.

The bootlegged alien is by all odds the least desirable. Whatever else may be said of him: Whether he be diseased or not, whether he holds views inimical to our institutions, he at best is a law violator from the outset and one whose entrance should be prevented if possible

rather than merely penalized by deportation.

BORDER PATROL

The origin, development, and scope of operation of this vitally important arm of the Immigration Service have been fairly set forth in the reports for the fiscal years 1925 and 1926. Nevertheless, it is felt that some amplification along these lines is pertinent and needful.

The year just closed marks the third of this organization's existence and has proved by all odds the one most filled with useful endeavor

and achievement.

Beginning July 1, 1924, with an appropriation of \$1,000,000 the personnel of the organization was recruited during the fiscal year 1925 to a maximum of 472. The million dollar appropriation was conincident as to date of effectiveness with the latest expression of the will of Congress respecting quota limitations and the adoption of further restrictions upon the admission of aliens ineligible to citizenship.

For the fiscal year 1926, \$1,000,000 was again provided by Congress for the border patrol, and later in the same year \$150,000 additional. The activities of the border patrol were, by the terms of the appropriation act, extended to embrace the seaboard in addition to the land borders. The personnel was expanded to a maxi-

mum strength of 632 employees.

For the fiscal year of 1927, just closed, the appropriation was increased to \$1,500,000 and the personnel to a maximum authorized strength of 781 employees, consisting at the close of the year of 1 supervisor, 4 assistant superintendents, 30 chief patrol inspectors, 170 senior patrol inspectors, 537 patrol inspectors, 24 clerks, 13 motor

mechanics, and 2 laborers.

During the first two years of the organization's existence limitations upon the purchase of motor equipment necessitated the procurement of automobiles under a system of allowances made to individual patrolmen owning cars. This was wholly unsatisfactory, the amount which it was possible to allow in any case being so limited as to make it impossible for any patrolman to operate his car, except within a very limited radius, without financial loss. Congress remedied this situation for the fiscal year 1927, with the result that it was possible to do away with the wholly unsatisfactory makeshift allowance

system and in its place to substitute Government-owned motor equipment. This equipment, added to that already owned, resulted in a complement of 232 automobiles, 14 trucks, and 6 motorcycles. In addition to these, 30 horse and pack-horse allowances were made.

Barracks or office quarters, or a combination of both, have now been provided for nearly all subdistrict headquarters throughout the territory covered by the patrol, and these subdistricts, with outposts, extend for many miles (several hundred in some instances) along the frontiers. Each frontier immigration district is a border-patrol district, of which there are 11 in all, with headquarters respectively at Seattle, Spokane, Grand Forks, Detroit, Buffalo, Montreal, Jacksonville, New Orleans, San Antonio, El paso, and Los Angeles. The failure of passage in the last session of Congress of the second deficiency bill, carrying \$200,000 for expenses of regulating immigration, necessitated the slowing down of activities of the border patrol during the last quarter of the year. In other words, the administrative officers of the Immigration Service were without adequate funds with which to handle the business produced by the border patrol, notwithstanding which the sum total of results accomplished by the border patrol during the year, as disclosed by the subjoined table, are highly gratifying, notably the 19,382 persons apprehended and delivered to other officials, 832 alien smugglers captured, 786 automobiles seized, 303 boats and other conveyances seized, and, last but not least, the 12,098 smuggled aliens captured. Many thousands of the smuggled aliens captured elected voluntarily to depart rather

than compel resort to formal deportation proceedings.

The border patrol is a young man's organization; it appeals strongly to the lover of the big outdoors—the primeval forests, the sunparched deserts, the mountains, and the plains; the business upon which it is engaged calls for manhood, stamina, versatility, and resourcefulness in the highest degree. "Honor first" is its watchword; privations and danger but serve as a challenge which none refuses. Unfailing courtesy to all, and helpfulness to the helpless in distress, are emphasized above every other requisite. These young men are proud of their jobs—proud of their organization—with a code of ethics unsurpassed by any similar organization of this or any other In the three short years of its existence it has created a priceless store of traditions. The pride of these men in their organization is equaled only by the pride and esteem in which they are held by the communities in which they operate. Spontaneous testimonials of this esteem are being constantly received by the bureau. almost unbelievable extent the border patrol is self-governing. Its members must be left largely to their own devices and upon their The weight of popular disapproval of his fellow officers is more potent with the erring one than all the printed regulations humanly possible to devise. The uniform is sacred; it not only symbolizes authority, the law's majesty and all the power of the Federal Government, but it entails obligations upon the wearer in the way of deportment which are intuitively recognized and scrupulously observed.

Ex-service men predominate in the border patrol; they must be and are physically fit; they are accustomed to discipline, take readily to it, and like it; they are charged with a serious responsibility and keenly realize it. In the vast majority of cases their work is a

religion.

It is the constant aim of the bureau to minimize paper work in the border patrol, without sacrificing the essentials, and in this endeavor

it is believed to have been singularly successful.

While charged primarily with the duty of apprehending violators of our immigration laws, it follows naturally and inevitably that the performance of these duties brings the patrolmen into contact with violators of many other laws—Federal, State, and municipal. These offenders are gathered in and delivered to the proper law-enforcement officers. Aliens figure largely on our coasts and land borders as smugglers of contraband. Particularly does this hold true of the Mexican Border where easily 95 per cent of the smuggling fraternity is alien. While these alien outlaws violate many different laws—prohibition, customs, public health, narcotics, horticultural, animal industry, neutrality, and so on, they one and all violate the immigration law, in the time, place, and manner of their entry.

In last year's annual report mention was made of the fact that the personnel of the border patrol should be brought up to at least 1,000 members. The experience of the past year has only served to

strengthen and confirm the conviction in this respect.

For the ensuing fiscal year the appropriation for the border patrol has been fixed, but for the year 1929 a minimum of \$2,000,000 has been asked for with which efficiently to operate. Even if this sum is supplied it will fall far short of producing a complement of 1,000 employees in the border patrol, in fact, after making due allowances for vacancies, sick and annual leave, we would have a paper strength of 924 employees, and an average actual effective strength of but 784 members.

Before closing this subject, I wish to pay tribute to those brave men of the border patrol who have made the supreme sacrifice in the line of duty. These heroes have died less gloriously, perhaps, but no less honorably than those who have given their lives on the battlefields for their country. The bureau's files are replete with stories of courage, devotion to duty, and sacrifice rivaling anything afforded by fiction.

Honor roll

Name	Where killed	Date	of death

	Mountains, Ariz.		,
Thad Pippin	In mountains near El Paso, Tex	Apr.	21, 1927

¹ Killed by an insane Mexican. The other men were killed by smugglers.

These men responded above and beyond the call of duty. The widows and orphans of the dead uncomplainingly face the world deprived of their natural protectors. The husbands and fathers entered the service with a full knowledge of its hazzards, but it does seem, nevertheless, that a more liberal provision than that afforded by the compensation act should be provided in this class of cases. The men in the border patrol constantly face hazards in contact with

desperadoes and outlaws who shoot and shoot to kill immediately they are challenged, and even though the performance of their duties forces them not infrequently to engage in mortal combat, they constantly face the necessity of defending their liberty and lives as best they may in State or county courts if they kill an outlaw. Every consideration of fairness and consistency demands that the same safeguards be thrown about these men and the same immunities extended to them as are accorded any and all other Federal officers, including the right of trial in Federal courts and defense at the hands of United States attorneys.

ADMINISTRATIVE FINES

During the past fiscal year the department imposed fines upon vessels bringing aliens, for violations of various provisions of the immigration laws, to the amount of \$440,010, \$79,000 of which, owing largely to the financial irresponsibility of the carriers, had not been collected up to the close of the year.

Suits (in personam) brought under section 27 of the act of 1924 netted \$17,350. Collections in connection with suits in rem are accounted for by the Attorney General, in consequence of which no

figures relative thereto are available.

Passage money in the sum of \$17,034.65 was ordered refunded by

the carriers to aliens found inadmissible.

The amount of fines assessed during the past year, \$440,010, as compared with \$644,540 of the year immediately preceding, reflects increasing efficiency of inspection abroad and a continued willingness on the part of steamship companies to cooperate—a most wholesome and gratifying state of affairs.

FINANCIAL STATEMENT

An appropriation of \$6,226,705 for the conduct of the Immigration Service and the administration of laws pertaining to immigration was made by Congress for the fiscal year covered by this report apportioned as follows:

For the enforcement of laws regulating immigration into the United	
States	\$4, 584, 865
Coast and land border patrol	1, 500, 000
For physical maintenance and upkeep of immigration stations	
For salaries, Bureau of Immigration	
Total	6, 226, 705

The net amount expended during the year for all purposes, after deducting refunds to the appropriation for expenditures not properly chargeable to the Government, was \$6,190,260.75, leaving an unexpended balance of \$36,444.25.

Balanced against the expenditures mentioned, there was collected, as hereinafter shown, the sum of \$4,267,782.58, making the actual

net cost of operation \$1,922,478.17.

Income and sources thereof

Head tax collected	\$3, 341, 032. 10
Administrative fines	392, 561. 69
Reentry permits and extensions	
Bonds forfeited and paid without suit	197, 931. 13
Sale of exclusive privileges (feeding, money exchange, etc.)	1, 187. 93
Sale of Government property	722. 43
Miscellaneous collections	
Coin-box collections, Ellis Island, New York Harbor	
Total	4, 267, 782. 58

SEASONAL LABOR

If the Congress in its wisdom should see fit to place the Western Hemisphere under the quota system (and frankly I can not but feel that the decision so to do is inevitable, when consideration is given to the many compelling influences thereto), it may be that with the adoption of proper safeguards a practical plan temporarily to admit seasonal unskilled labor, where like kind unemployed is not available, may be evolved. Frankly, I perceive many difficulties in the way of an effective control of aliens so admitted, but it occurs to me that the problem might be susceptible of solution.

CITIZENSHIP AND THE ALIEN

The acid test of any civilization, nation, or system of government is the men and women it produces, and with equal truth it may be said that the acid test of the men and women of any time is the nation and system of government they evolve, the conditions of living they develop.

To say that good immigration makes good citizenship, is to state a self-evident truth, a fact so obvious that its bare assertion seems superfluous; nevertheless, I am impressed by a seeming apathy upon the part of the public as a whole to this vitally important truth. I can not and do not believe that this seeming indifference upon the part of Americans is due to anything more than a failure fully to

appreciate the relationship between the two.

True, we have but recently sharply curtailed the volume of immigration annually flowing through our ports from the Old World. We long ago excluded Chinese laborers, and we have declared, by the act of 1924, that with certain exceptions aliens incligible to citizenship may not enter except under existing treaty stipulations. But who are these aliens ineligible to citizenship? Considered in the mass rather than individually, they are—so far as the courts have interpreted the statutory inhibitions against naturalization— Chinese, Japanese, and Hindus. These decisions of the courts have been based upon ethnic considerations. The major test of eligibility to citizenship is racial. The immigration laws, with certain exceptions, as already stated, bar these ineligibles from entry. But it does not follow that all aliens not barred from the United States will make good citizens. Evidence of the fallacy of any such belief is steadily growing. It is exceedingly vital in my opinion that we should have an aroused national consciousness in matters relating to citizenship. The raw material of our future citizenship pours through our ports from the Western Hemisphere without numerical limitation. Is it good citizenship material? We know much of it is not. True, we can exclude from admission the alien who proclaims himself a deep red, but there are all shades of dissenters, and upon application for admission, these, with rare exceptions, declare no beliefs inimical to our institutions. It is not until after they get in that they assert themselves, and in so doing they are usually careful to avoid saying or doing openly the things that would subject them to expulsion under existing statutes.

It seems to me that the most vitally important task ahead of us is to work out some better plan than we now have of determining not only what aliens seeking to enter our country will readily assimilate, but who will as well assist in maintaining the ideals upon which

our country was founded.

I believe that the examinations at our ports of entry should go further than the law now appears to contemplate, and that Congress should give consideration to the advisability and practicability of requiring appropriate tests to determine whether alien applicants for permanent admission are good citizenship material, with a view to the rejection of those found to be otherwise.

LEGISLATION RECOMMENDED

In my last annual report I made certain recommendations for legislation to render the administration of the immigration laws more consistent and efficient. These recommendations are, with some exceptions and modifications, herein renewed and added to in the

light of another year's experience.

First. That the exemption from the operation of the illiteracy inhibition as set forth in section 3 of the immigration act of 1917 reading "All aliens who have been lawfully admitted to the United States and who have resided therein continuously for five years and who return to the United States within six months from the date of their departure therefrom" be broadened so as to provide that aliens holding valid unexpired reentry permits shall not be excluded because of illiteracy, and that subdivision F of section 10 of the immigration act of 1924 be also amended so as to harmonize with the amendment of section 3 of the act of 1917 as proposed.

Second. That statutory grounds for both exclusion and deportation be broadened and that the whole body of law dealing with immigration be codified in the manner and for the reasons set forth in my

last annual report.

Third. That section 8 of the immigration act of 1917 be amended to provide a specific penalty for the offense of harboring and concealing smuggled aliens, in view of decisions of certain courts that this clause of section 8 is inoperative because Congress did not in clear language provide a penalty for the offense.

Fourth. I believe further that aliens deliberately entering the United States surreptitiously should be made subject to criminal prosecution.

Fifth. If the Congress should not see fit to make it a criminal act for aliens generally surreptitiously to enter the United States, then it would seem that it should not hesitate to make it a crime at least for the criminal, diseased, immoral, and anarchistic classes so to enter, and in any event to penalize by imprisonment the surrepti-

tious reentry of any alien previously excluded or deported.

Sixth. That natives of countries of the Western Hemisphere be brought within the quota provisions of existing law and that section 4 (c) thereof be repealed. As previously stated, it is felt that migration from this source stands no less in need of limitation than the migration of our parent stock from Europe. The design of the present law is obviously to bring to our shores in reasonable numbers the races and peoples from which we are chiefly descendant. I can not reconcile the unlimited flow of immigrants from the Western Hemisphere with the sharp curtailment of immigrants from Europe.

Seventh. That omission from section 15 of the immigration act of 1924 of authority to require bond in appropriate cases in connection with the admission of immigrant students be remedied. Liberality should be extended to those who seek to avail themselves of our educational institutions, but at the same time I feel there should be authority, in the interest of good administration, to exact a bond

where desirable of immigrant students admitted, conditioned for their departure from the United States. The present situation works to the disadvantage of the alien in obliging the port officials to exclude in a doubtful case, whereas if bond were possible, doubts might be resolved in favor of the applicant in many instances without jeopardy

to the accomplishment of the general purposes of the act.

Eighth. That a nonquota status in the issuance of immigration visas be given to the dependent parents over 60 years of age, to the husband, and to the children between the ages of 18 and 21 of citizens of the United States. The number who would be benefited by this modification of existing law is not large, and I believe considerations of fairness and humanity fully support my recommendation. Certainly citizen wives should have the right to petition for nonquota status in behalf of their alien husbands, just as American husbands now have that right in respect of their alien wives.

Ninth. That legislation be enacted authorizing the seizure and forfeiture of vehicles or vessels used to import aliens into the United States in violation of the provisions of the immigration laws, or to transport them thereafter pursuant to such illegal importation and to permit the Immigration Service to make use of such vehicles and

vessels after they have been ordered forfeited by the courts.

Tenth. That legislative authority be granted, to be exercised within the discretion of the Commissioner General with the approval of the Secretary of Labor, to legalize the residence of aliens in meritorious cases by means of nunc pro tunc examinations to be held by immigrant inspectors, coupled with a physical and mental examination by officers of the United States Public Health Service. problem of the decent and law-abiding alien in our midst (who has formed ties of various sorts, often including families) whose original entry was attended by irregularity—possibly a failure of the officers to inspect, or incompleteness of record, or perhaps unwitting and wholly innocent failure to submit himself for inspection at the proper time and place, and all before any quota restrictions became effective is a real and difficult one. Many such aliens deserve some special consideration. Perhaps they desire to leave the country and return; but, in the absence of a proper record of legal permanent admission, no relief can be accorded them. If they depart from the country they must in returning thereto be subject to all the restrictions imposed upon initial entrants. They can not become United States citizens, and the presence in the United States of this unassimilated element is undesirable in the extreme.

Eleventh. I desire to reiterate and urge that provision be made for the payment of the traveling expenses of officers and employees of this service, and the expenses incurred in the moving of their families and household effects pursuant to official transfers in the line of duty. Ever-changing conditions in the Immigration Service render it imperative that personnel should be shifted about with considerable frequency. For an officer or employee to be forced in the line of duty to give up his home and move to another official station, all at his own expense, is absolutely unjust.

Twelfth. That a schedule of pay for officers and employees of the Immigration Service stationed outside continental United States be formulated and authorized by Congress in line with rates of pay granted other civilian officers and employees performing duty overseas

of equivalent importance; that automatic increases up to at least \$3,000 per annum for immigrant inspectors stationed in continental United States, be authorized, contingent upon efficient service.

Thirteenth. That adequate buildings be provided for the care of aliens detained in deportation proceedings. At present such aliens

are largely confined in jails.

Fourteenth. The Secretary of Labor should be given broader powers to admit aliens in hardship cases—political refugees, artists, and intellectual geniuses, and wives of aliens admitted for permanent residence prior to July 1, 1924, who have declared their intention to become citizens of the United States. With wise limitations and restrictions this power can be safely conferred upon the department without danger of abuse.

Fifteenth. That appropriate adaptability tests be authorized, with a view to determine whether an alien applying for admission to the United States is good citizenship material and that authority be

given to exclude from admission those failing in such tests.

Sixteenth. As indicated elsewhere in this report the border patrol should be materially strengthened. A more liberal provision than that afforded by the compensation act, should be provided for the widows and orphans of those killed in line of duty. The same safeguards should be thrown about the members of the border patrol and the same immunities extended to them as are accorded any and all other Federal law-enforcement officers, the performance of whose duties involves hazards to life, including the right of trial in Federal courts and defense at the hands of United States attorneys.

Seventeenth. Statistics continue to show that a very substantial volume of alien visitors, or nonimmigrants, is admitted each year. These aliens are not presumed to stay here permanently and with the careful scrutiny given their cases by the American consuls abroad, assisted by technical advisers and by administrative officers at the ports of entry, I doubt that any considerable proportion is abusing the privilege to evade the quota. However, I do feel that the number is sufficiently large to warrant a more careful check upon them than is possible at the present time with the force available. work properly, to insure departure of those who should depart, we should have an additional inspection and clerical staff. of such a staff would undoubtedly have a salutary effect as a deterrent and at the same time do much to educate the public in a feature of the law that is not clearly understood. A system of keeping check on overstayed visitors in this country would likewise enable the department more intelligently and satisfactorily to pass upon applications for extensions of time.

DISCUSSION OF ADMINISTRATIVE PROBLEMS

FIELD

I am convinced that a plan should be placed in operation whereby admitted aliens will be furnished with certificates of identification for their own protection and for the assistance of immigration officers in determining their status when any such admitted aliens are made the subject of investigation. Such certificates of identification would

meet a long-felt need and one which has been repeatedly urged by

I believe that consideration should be given to the question of designating certain of the more important coast and land border ports as schools for the training on the job of immigrant inspectors and border patrol inspectors, and, with this in view, that probational appointees should be initially assigned to such places and thereafter to other stations as need of their services thereat arises, such reassignments to be made, however, only after the new appointee has satisfactorily completed his period of probation. Probationers failing to measure up to the requirements should be promptly dropped from the rolls at the training points. A system of training of this sort would not only make for uniformity of standards of efficiency and uniformity of practices, but would obviate the necessity of assigning green, inexperienced, untrained men to new jobs or vacancies where but little, if any, opportunity is afforded to give them special atten-Such a system would require a comparatively small increase in the personnel. Vacancies at the training points, resulting from the transfer of trained personnel, would be immediately filled by the appointment of new probationers. Field officers generally find the new appointees of relatively little value for the first six months or longer. In fact they are more frequently than not a distinct liability, especially where, as is almost invariably the case, the field staff is functioning with a minimum number of employees.

I wish to invite particular attention to the fact that our field service is undermanned. It is impossible for it to attend to many vitally important matters pressing for attention. Hundreds if not thousands of reports of aliens unlawfully in the United States or engaged in unlawful activities have to remain unattended to, only the most flagrant receiving attention. Last January a survey of our penal institutions, insane asylums, hospitals and poorhouses disclosed over 113,000 alien inmates. How many of these were subject to deportation could only be ascertained by individual and, in many cases, long-drawn-out investigations—interviewing of friends, relatives, and the like, scattered throughout the country. The officers who made the preliminary survey had to return to their pressing tasks as quickly as possible. The essential task of investigating the individual inmates of these institutions and of deporting those subject to deportation, thereby relieving the institutions of such burdens, could not be attended to then, nor can it be attended to now, because

of the lack of officers to do the work.

BUREAU

Despite every effort to systemize the work of the bureau, the adoption of shortcuts and the elimination of every operation that is not vitally essential, the bureau generally is understaffed. We are constantly taking help from one division where the need is somewhat less urgent to help out in another that has fallen behind—borrowing from Peter to pay Paul. The financial rewards offered are not sufficient to attract and retain the best talent. Trained and efficient employees leave us for higher pay in other walks of life and even in other departments of the Government.

CONCLUSION

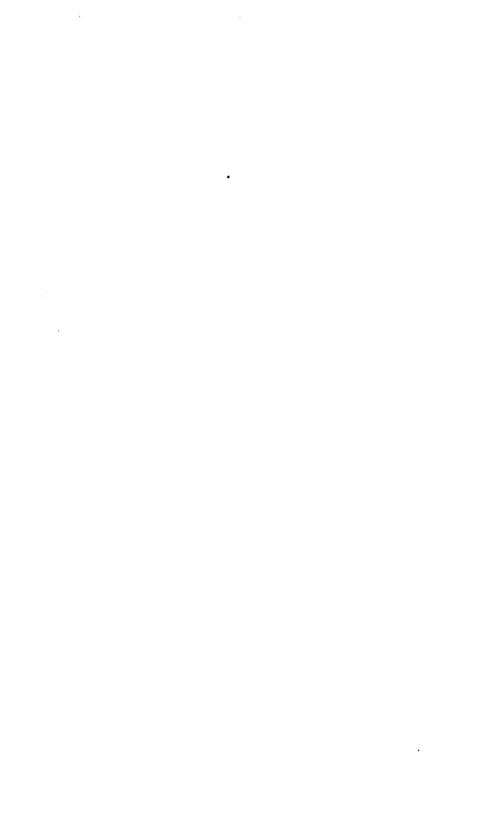

In conclusion I desire to express my appreciation of the splendid service rendered during the year just closed by the loyal, efficient workers in the field and in the bureau, and to thank you and the other officials of the department for the sympathetic and helpful aid at all times extended.

Respectfully submitted.

HARRY E. HULL, Commissioner General.

APPENDIX

STATISTICS OF IMMIGRATION

APPENDIX-STATISTICS OF IMMIGRATION
